

DANILO FILGUEIRA MENDONÇA

SOFTWARE ENGINEER

CONTACT

dfmendonca@gmail.com 

Brasília 

EDUCATION

PhD

Information Technology

Politecnico di Milano

May 2015 - Apr 2019

MSc

Computer Science

Universidade de Brasília

Aug 2012 - Nov 2014

Telecommunications

Engineer

Universidade de Brasília

Mar 2006 - Dec 2011

SKILLS

Software architecture

Software design patterns

Cloud computing

Infrastructure-as-a-Service

GraphQL

Ruby on Rails

Node.js

Embedded systems

C++

Java

Docker

CI/CD

PostgreSQL

TimeScale

MongoDB

WORK EXPERIENCE

Software engineer

Origem Motos

Oct 2019 - current

- Led and managed the software team using Agile methodology
- Built a solid cloud infrastructure able to scale to a high volume of telemetry data (RabbitMQ, TimeScale)
- Built event-driven services (Ruby on Rails, Node.js, Hasura, GraphQL)
- Built test-driven embedded software for critical products (C++)
- Enabled data-driven technical and business decisions via efficient data analysis (Metabase)

Founder / Software engineer

Mobee

March 2013 - May 2015 / Brasília

- Lead the crowd-based data collection campaign via social networks
- Interfaced with the public transportation administration
- Built the software solution using high productivity backend (Ruby on Rails and frontend (Cordova / Phonegap) frameworks

Software developer

SEA Tecnologia da Informação

Aug 2011 - May 2013

- Built reliable and scalable software solutions using Java Portlets specification for various Brazilian government institutions, including the Brazilian Army

Software developer

Checkbox T.I

Jul 2008 - Jul 2011

- Built customized web applications using Java EE, Spring, and JSF
- Built a text to sign language translator engine for the Bank of Brasília (BRB) embedded in their institutional website

Software developer

TCU

Jul 2007 - Jun 2008

- Built enterprise web applications using Java EE, Spring, and JSF
- Developed database procedures for Oracle DB
